Education

Bachelor of Science in Computer Science and Information Technology

2022 – 2026

BSc CSIT

- Final-year undergraduate student
- Relevant coursework: Data Structures and Algorithms, Database Management Systems, Software Engineering, Web Technology

Technical Skills

Languages: JavaScript, Java, C, C++, SQL

Frontend: React.js, HTML5, CSS3, React Router, Axios

Backend: Node.js, Express.js, REST APIs

Database: MongoDB, Mongoose, MongoDB Atlas

Authentication & Security: JWT, bcryptjs, Role-Based Access Control

Tools: Git, GitHub, Postman, Visual Studio Code

Projects

Restaurant QR Ordering System

[GitHub](#) [🔗](#)

- Developed a full-stack QR-based restaurant ordering and management system using the MERN stack.
- Implemented customer workflows for dine-in and parcel orders, including menu browsing, cart management, item remarks, checkout, and order tracking.
- Built RESTful APIs for authentication, food, category, order, and staff management using Node.js and Express.js.
- Implemented JWT authentication, bcryptjs password hashing, protected routes, and role-based authorization for Admin, Waiter, and Super Admin users.
- Implemented real-time order updates and customer order tracking using Socket.IO.
- **Technologies:** React.js, Node.js, Express.js, MongoDB, Mongoose, Socket.IO, JWT, Axios

Life-Link – Blood Donor Finder

[GitHub](#) [🔗](#)

- Developed a web-based blood donor finder platform connecting recipients with suitable donors based on blood group and donor information.
- Implemented donor, recipient, hospital, and administrator workflows with authentication and role-based access.
- Developed REST APIs using Node.js and Express.js with MongoDB for donor, recipient, and blood request management.
- Implemented donor matching using the K-Nearest Neighbors (KNN) approach.
- **Technologies:** React.js, Node.js, Express.js, MongoDB, JWT, bcrypt

Experience

Software Development Intern

Intern

- Hands-on experience developing full-stack applications using React.js, Node.js, Express.js, and MongoDB.
- Experience with REST API development, database integration, authentication, authorization, debugging, and Git-based version control.

Development Practices

- RESTful API design and frontend-backend integration
- MongoDB database modeling using Mongoose
- JWT authentication and role-based authorization
- Real-time application features using Socket.IO
- Git and GitHub version control

- API testing and debugging using Postman
